

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Original) A document data transmission device comprising:

storage means for storing plural document data pieces including one or plural page data pieces;

page data transmission request receiving means for receiving a page data transmission request transmitted from a user terminal, requesting to transmit specific page data contained in specific document data selected among the plural document data pieces stored in the storage means; and

page data transmitting means for transmitting the specific page data contained in the specific document data to the user terminal through a satellite network, on the basis of the page data transmission request received by the page data transmission request receiving means.

2. (Original) A document data transmission device according to Claim 1, wherein the storage means stores plural summary data pieces including contents information of each of the plural document data pieces,

the document data transmission device further comprising:

summary data transmission request receiving means for receiving summary data transmission request transmitted from the user terminal, requesting to transmit a specific summary data selected among the plural summary data pieces stored in the storage means; and

summary data transmitting means for transmitting the specific summary data to the user terminal, on the basis of the summary data transmission request received by the summary data transmission request receiving means.

3. (Original) A document data transmission device according to Claim 2, further comprising:

billing amount calculating means for calculating a billing amount charged to a transmission of the page data and to a transmission of the summary data, on the basis of a unit price charged to a transmission of a unit data quantity of the page data and a unit price charged to a transmission of a unit data quantity of the summary data.

4. (Original) A document data transmission reception system comprising:

the document data transmission device according to Claim 1; and

a user terminal for transmitting a page data transmission request requesting to transmit the specific page data to the document data transmission device, and receiving the specific page data transmitted from the document data transmission device through a satellite network.

5. (Original) A document data transmission reception system comprising:

the document data transmission device according to Claim 2; and

a user terminal for transmitting a summary data transmission request requesting to transmit the specific summary data to the document data transmission device, and receiving the specific summary data transmitted from the document data transmission device.

6. (Original) A document data transmission method for transmitting document data from a document data transmission device having storage means for storing plural document data pieces including one or plural page data pieces, the method comprising:

receiving a page data transmission request transmitted from a user terminal, requesting to transmit specific page data contained in specific document data selected among the plural document data pieces stored in the storage means; and

transmitting the specific page data contained in the specific document data to the user terminal through a satellite network, on the basis of the received page data transmission request.

7. (Original) A document data transmission method, according to Claim 6, wherein:
the storage means stores plural summary data pieces including contents information of each of the plural document data pieces,
the document data transmission method further comprising:
receiving a summary data transmission request transmitted from the user terminal, requesting to transmit specific summary data selected among the plural summary data pieces stored in the storage means; and
transmitting the specific summary data to the user terminal, on the basis of the received summary data transmission request.

8. (Original) A document data transmission method according to Claim 7, further comprising:
calculating a billing amount charged to a transmission of the page data and to a transmission of the summary data, on the basis of a unit price charged to a transmission of a unit data quantity of the page data and a unit price charged to a transmission of a unit data quantity of the summary data.

9. (Original) A document data transmission device comprising:
storage means for storing plural document data pieces including one or plural page data pieces and plural summary data pieces including contents information of each of the plural document data pieces,
page data transmission request receiving means for receiving a page data transmission request transmitted from a user terminal, requesting to transmit specific page data contained

in specific document data selected among the plural document data pieces stored in the storage means,

page data transmitting means for transmitting the specific page data contained in the specific document data to the user terminal through a satellite network, on the basis of the page data transmission request received by the page data transmission request receiving means,

summary data transmission request receiving means for receiving a summary data transmission request transmitted from the user terminal, requesting to transmit specific summary data selected among the plural summary data pieces stored in the storage means, and

summary data transmitting means for transmitting the specific summary data to the user terminal, on the basis of the summary data transmission request received by the summary data transmission request receiving means.

10. (New) The document data transmission device of claim 1, wherein the page data transmission request is transmitted from the user terminal to the page data request receiving means via a ground-based network.

11. (New) The document data transmission device of claim 10, wherein the ground-based network comprises the Internet.

12. (New) The document data transmission device of claim 1, wherein each of the plural document data pieces comprises a plurality of page data pieces.

13. (New) The document data transmission device of claim 12, wherein each page data piece corresponds to at least one of data to be printed out on a single sheet of recording paper and data to be viewed on a single screen of a display.

14. (New) The document data transmission device of claim 1, wherein the plural page data pieces comprise at least one of text data and picture data.
